Projects

CDIS App

Clinical Documentation Specialist App | March 2020

The CDIS App is a full stack application developed with a ReactJs front end and a Django backend using a SQLite database. The CDIS app is currently being used by employees of Emory Healthcare in order to make their daily work task more organized and structured.

MotorBoard

Online/Mobile Vehicle Log |October 2019

To develop MotorBoard, React, Django, and the SQLite database were primarily used. This is a web application that is a lot similar to a car's CarFax report. The difference between the two is with MotorBoard the user has total control of what is logged about his/her vehicle.
